Subject: RE: Environmental Indicator Updates

Hi Chris,

Got it, thanks!

Thanks,
Bonnie

Bonnie,

You can keep that same description but change the date to make it current (August 2020). That's still where we stand.

Thanks! – Chris

Hi Chris,

One additional item has been identified for the yearly EI updates that requires your review. Can you please review and provide updates to the 'Human Exposure Pathway Description' below? Once reviewed/approved by HQs, the description will be made available on the public Site Profile Page.

Nonresponsive based on revised scope

If any additional information is needed, please let me know.

Thanks!

Hi Chris,

Thank you for the quick response! The Keystone date is the date all "long-term human exposure-related cleanup goals have been met for the entire site". The 2025 date that corresponds to the RA completion in SEMS is a fine estimate. You could have an RA completed and not yet have achieved cleanup goals (depending on the site and nature of contamination). We'll use the dates you've listed below, including the 12/31/2025 date for Keystone, unless we hear otherwise.

Thanks again!

Subject: RE: Environmental Indicator Updates

Step,

Keystone: I am assuming that field refers to the date EPA projects all performance standards will be met. The date I entered in SEMS for RA completion for the two outstanding OUs is 12/31/2025, so if my assumption is correct, that date should replace the highlighted date.

Nonresponsive based on revised scope

Let me know if you want to go over any of this. I understand that the gods may not always like to see dates too far out in the future, but I'll start with what we currently have projected and go from there.

Thanks! – Chris

Subject: Environmental Indicator Updates

Hey Chris,

While Chris Corbett is on detail, I'm working with the SEMS team to update the environmental indicators. Could you please review the highlighted questions on the attached forms (summarized below) and get back to us with any necessary updates?

Chris Sklaney

Keystone Sanitation Landfill

- Human Health worksheet
 - Please review and provide updated date for 'Estimated Date Long-Term Human Health Protection will be Achieved', if needed.

Nonresponsive based on revised scope

Feel free to contact me with any questions.

Thank you!

Stepan
